

THE BOTTOM LINE!

Property tends to be one of the top three business costs for any small to medium sized enterprise and can form a large part of Company's assets. You would not be surprised to learn that most businesses, especially in the current market, leave no stone unturned in their efforts to improve profitability, however you may be surprised to hear that it is not the case when it comes to property costs. We have found there is an inconsistent approach of occupiers and property developers when it comes to their own property efficiency.

Do these statements sound familiar?

- Limited in-house property experience to manage your assets and liabilities?
- Lack of knowledge in cost reduction programmes, management contracts, facilities management?
- Do you have a clear property plan?
- Is there clear transparency of your occupational costs and are you clear on cash generating opportunities within your existing portfolio?

SME's would not give a second thought to instructing an Accountant to deal with a tax bombshell or instruct a Solicitor on a contract or employment law issue. Let Parkinson be the professional you turn to for expert advice on all of your property matters.
